Career Objective

Computer Science and Engineering student graduating in 2027 with foundations in Python, Java, SQL, data structures, object-oriented programming, and DBMS. Project experience includes Python web applications, REST API integration, database-backed services, and an AI-powered document assistant. Interested in backend engineering, API design, data integrity, testing, and reliable software. Currently building deeper familiarity with Go and production backend practices.

Education

B.E. in Computer Science and Engineering
ATME College of Engineering | CGPA: 8.21/10 | 2023–2027

Technical Skills

Programming Languages: Python, Java, SQL, Go
Computer Science Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Backend & APIs: FastAPI, Flask, REST API integration, request validation, error handling
Databases: MySQL, PostgreSQL, Redis, ChromaDB, relational database fundamentals
Tools & Testing: Git, GitHub, Pytest, Docker, VS Code, IntelliJ IDEA

Projects

WorkFlow API | Backend Development Project | Node.js, Express.js, TypeScript, PostgreSQL, SQL, REST APIs, JWT, Zod, Vitest, Supertest.

- Developed a RESTful API using Node.js, Express.js, TypeScript, and PostgreSQL to manage projects and tasks with complete CRUD operations.
- Implemented JWT-based authentication, bcrypt password hashing, and project ownership authorization to secure API endpoints.
- Integrated Zod for input validation and parameterized SQL queries to improve data integrity and prevent SQL injection.
- Wrote automated API tests using Vitest and Supertest

GitHub Profile Analyzer | Python, Flask, GitHub API

- Developed a web application to analyze GitHub profiles and repository statistics.
- Integrated REST APIs, implemented error handling, and deployed on Render.

PDF Chat Assistant — RAG-Based AI Application

- Developed a PDF Chat Assistant that allows users to upload PDF documents and ask questions about their content.
- Implemented semantic search and RAG to retrieve relevant information from uploaded PDFs and generate AI-powered answers.
- Built the application using FastAPI, Streamlit, ChromaDB, Sentence Transformers, and Groq LLM.

Soft Skills

Attention to Detail, Decision Making, Problem Solving, Teamwork, Adaptability, Time Management
